CAT FOOD

FE-LINE Cat Food kibbles have been specially formulated to adequately provide the balanced nutritional need for all breeds. Correct amount of Protein, Fats, Carbohydrates, Fiber, Minerals and Vitamins have been added as per AAFCO guidelines (Association of American Feed Control Officials).

Animal based Proteins have a much greater digestibility and benefit for cats than cheaper plant Proteins. Particular effort has been made to utilize maximum amount of animal sourced proteins, therefore more than 90 % of the Protein in Feline Cat Food has been derived from Fish and Chicken.

Similarly more than half of the Fat percentage is based on Fish and Chicken fat both of which are important for a healthy and shiny coat.

Fibers are an essential part of a cat's diet and very important for a healthy digestive tract. A combination of Fibers from natural Animal and Vegetable sources has been added to achieve the best results.

FE-LINE Cat Food is enriched with correct amounts of Vitamins such as A, D, B's and E for general growth and health benefits, furthermore all essential minerals have been added in sufficient quantity keeping in view the requirements of various breeds.

FE-LINE Cat Food is much healthier than most of the Asian made imported brands that are using cheaper materials to prepare pet food.

Correct amount of Phosphate has been added. Some of the manufacturers usually add it in excessive quantities to make the feed more palatable for cats, this results in premature renal failures and other health issues.

FE-LINE Cat Food price is less than half the price of premium European and USA brands.

FE-LINE Cat Food can be fed in lesser quantities than imported brands due to its higher nutritional value and still furnish superior results, users will observe the outcome in 4 weeks or less.

FE-LINE Cat Food has been thoroughly tested and evaluated on a variety of cats from pedigree breeds with amazing results.

FE-LINE Cat Food is guaranteed to be free from all Artificial Flavors, Food Colors and Preservatives. These types of ingredients are mostly the cause of long term pet health issues and are only used to craft inferior quality palatable pet food.
