PUPPY FOOD

K-9 Puppy Food kibbles have been specially formulated to adequately provide the balanced nutritional need for all breeds. Correct amount of Protein, Fats, Carbohydrates, Fiber, Minerals and Vitamins have been added as per AAFCO guidelines (Association of American Feed Control Officials).

Animal based Proteins have a much greater digestibility and benefit for puppies than cheaper plant Proteins. Particular effort has been made to utilize maximum amount of animal sourced proteins, therefore more than 90 % of the Protein in K-9 Puppy Food has been derived from Fish and Chicken.

Similarly more than half of the Fat percentage is based on Fish and Chicken fat both of which are important for a healthy and shiny coat.

Fibers are an essential part of a puppy's diet and very important for a healthy digestive tract. A Combination of Fibers from natural Animal and Vegetable sources has been added to achieve the best results.

K-9 Puppy Food is enriched with correct amounts of Vitamins such as A, D, B's and E for general growth and health benefits, furthermore all essential minerals have been added in sufficient quantity keeping in view the requirements of various breeds.

K-9 Puppy Food is much healthier than most of the Asian made imported brands that are using cheap waste materials to prepare pet food.

K-9 Puppy Food price is less than half the price of premium European and USA brands.

K-9 Puppy Food can be fed in lesser quantities than imported brands due to its higher nutritional value and still furnish superior results, users will observe the outcome in 4 weeks or less.

K-9 Puppy Food has been thoroughly tested and evaluated on a variety of puppies from pedigreed Giant, Mid and Small sized breeds for a sufficient time period with amazing results.

K-9 Puppy Food is guaranteed to be free from all Artificial Flavors, Food Colors and Preservatives. These types of ingredients are mostly the cause of long term pet health issues and are only used to craft inferior quality palatable pet food.
